\$4,500,000 CONTRACT WITH BELGIUM

Hopkins and Allen Arms Company Has Agreed to Make 150,000 Mauser Rifles for Belgium Government—\$500,000 Payment Made and Deliveries to Begin in January

Replaces Optional Contract to Supply British Army—More Business in Sight.

A contract for 150,000 rifles has just been placed with the Hopkins & Allen Arms Co. by the Belgian government.

The Hopkins & Allen Arms Co. of Massachusetts was organized about three months ago to take over the business of the Hopkins & Allen Arms Co. of Connecticut, established in 1884.

The new corporation has a capital of \$1,000,000, of which \$500,000 is convertible preferred stock and \$500,000 common. Of the common stock, \$100,000 is held by the old company.

The contract for the conversion of the preferred stock into common is expected to be completed by July 1, 1916, at 110 per cent.

The French government has agreed to purchase 100,000 rifles at a cost of \$1,150,000. Of this, \$1,000,000 was made here, and the balance of \$150,000 is to be made in Belgium.

The Belgian contract is at \$4,500,000.

A. McGee, president of the company, said that profits should be large and since the demand for rifles is so large the company should be able to make profits amounting into the millions.

General Manager George S. Watts said Wednesday that the preparation to manufacture 400,000 Lee-Enfield rifles for the English government have been discontinued. This announcement having been embodied in a statement recently issued to the stockholders of the company. It was an optional contract for the manufacture of 400,000 rifles of the British type of weapon had not advanced so far as to cause any inconvenience to the company by its withdrawal.

The change in plans, The Belgian Mauser is a simpler rifle than the British Lee-Enfield, and it is simpler and quicker to make. No difficulty in meeting the terms of this contract are anticipated.

The contract calls for 150,000 rifles and 200 per cent. spare parts, and still other work is in prospect. Mr. Watts said, which the company with its enlarged plant will be in a position to satisfactorily handle.
